Release notes

Changes and bug fixes

1. The QC validation pop-up dialog could not be dismissed and this has been fixed.

2. .

Customer specific changes

1. The test large request entry screen was failing to properly request bill only tests and this has been fixed. (P)
2. The HL7 pre-book request entry screen has had the date input field modified. The specimen date and time taken fields now default to blank and are enterable. The request date and time fields now default to the current date and time. (P)
3. Numerical results exported to HL7 are now being rounded to match the settings for the printed reports. (C)
4.
